Overview

The *HungerRush 360 Restaurant Management* is the core for how the new *HungerRush 360* POS v2 is configured for your business. The *HungerRush 360 Restaurant Management* System Configurations define how the new *HungerRush 360* POS v2 interacts with labor, employees, cash control, inventory, coupons, and online ordering.

In the *HungerRush* POS v1, System Configuration changes could be made within the POS. With the release of the new *HungerRush 360* POS v2, these System Configuration options have been moved to the *HungerRush 360 Restaurant Management*, so changes to these setting should be made there rather than in the POS.

Purpose

The purpose of this user guide is to compare the functionality you were familiar with in the legacy *HungerRush* POS to the improved functionality now available in the *HungerRush 360 Restaurant Management*, so you can perform the System Configurations previously made in the legacy *HungerRush* POS.

Login and Access Restaurant Management

Follow the steps below to access HungerRush 360 Restaurant Management:

- 1. Go to HungerRush 360 Restaurant Management
- 2. Enter your login credentials and click SIGN IN

🗘 HungerRush	
Sign In	
Please Sign Into Your Account	
User name user@email.com	
Password	
FORGOT PASSWORD SIGN IN	
Powered by Hungerrush LLC. 20.7.4.0602	

3. The HungerRush 360 Restaurant Management Dashboard displays.

ထု HungerRushi360 Restaurant Management			~			💄 user 🛛 Log off
≡ ▲	Reports Coupons	Curbside Drive	er Track Employees	Inventory Loyalty	Menu Store	S & G System Co

On the **Dashboard**, users have a snapshot of their metrics. The time periods for these metrics default to **30 DAYS**, but can be customized by selecting the desired time period from the drop-down menu in each section of the screen.

System Configuration

To make System Configuration changes, first locate the **System Configuration** options. The steps and images below give a side-by-side comparison of how users previously located System Configuration options in the Legacy *HungerRush* POS v2 and how to access them from the new *HungerRush* 360 Restaurant Management.

1. Navigate to the listing of **System Configuration** options by selecting **Manage > System**.

Access System Configuration Options

System Configuration is an area that typically is not modified or accessed after the initial installation of a POS System. System Configuration includes hundreds of different settings that include cash management options, order type configuration, customer configuration, etc.

Order Types (Formerly Order Types & Stages)

The images below show a side-by-side comparison of the **Order Types** options users could access from the *HungerRush* POS v1 and where to access these options from the *HungerRush* 360 Restaurant Management.
