Enhanced Syncing in Restaurant Management

Unlock Greater Efficiency with Our New Cloud-Based Syncing Feature!

Overview

We are excited to unveil our latest enhancement—the Cloud-Based Syncing Feature—designed to elevate your menu management and operational efficiency. This update seamlessly integrates RM and POS systems, transforming the way you handle menu updates

Key Benefits

1. Reliability:

Our new syncing mechanism significantly reduces sync failures, ensuring that your data transmission is smooth.

2. Centralized Control:

Manage your menu from anywhere with our cloud-based platform. Enjoy the convenience of making updates from any location, ensuring uniformity across all your locations.

3. Real-Time Syncing:

Experience instant updates with real-time syncing. Changes made on the RM platform are instantly reflected in your POS system, keeping your information current and accurate at all times.

4. Boosted Performance:

Optimizations lead to faster syncing times and improved efficiency. Enjoy quicker updates and a more responsive system that enhances your overall performance.

5. Scalable Solutions:

Our syncing feature is built to grow with your business. It handles increased data volumes and user activity without compromising on performance or stability.

How It Works

This feature is only available to those who use Restaurant Management to edit their menu(s).

Steps

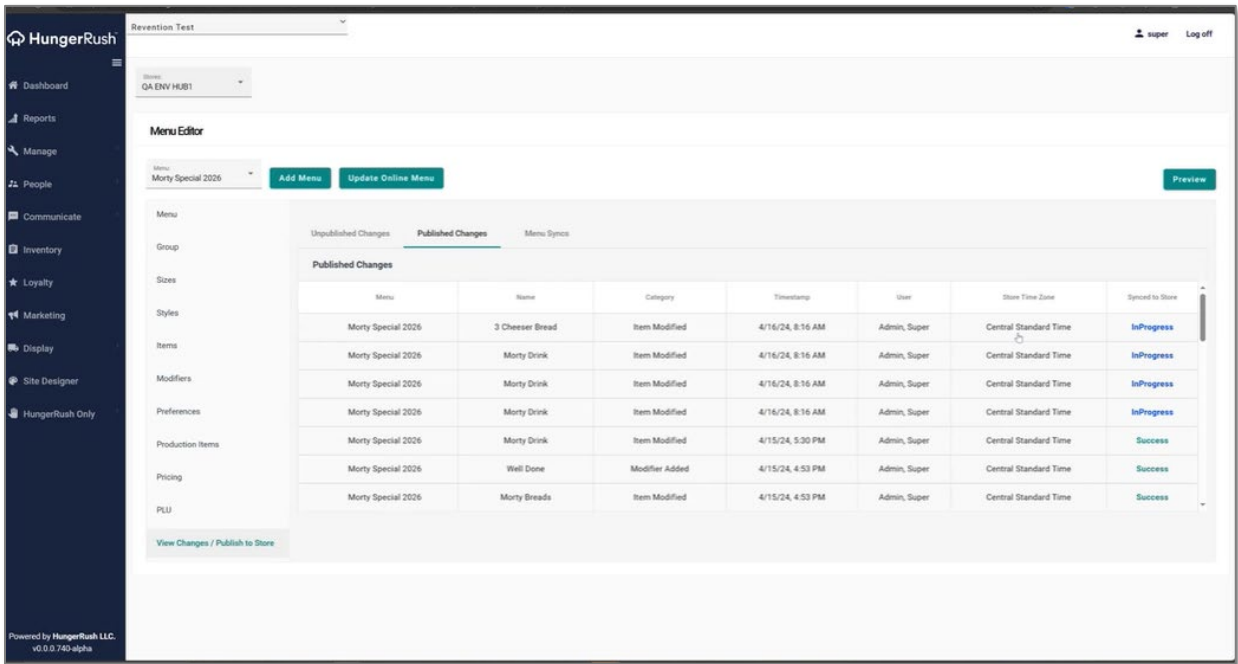

1. Enable Restaurant Management Menu Editor.

Please Note: POS menu editing will be disabled to prevent conflicts, ensuring that all changes are accurately reflected across systems.

2. Make menu edits in Restaurant Management
3. Publish menu edits

4. Track the syncing status with real-time updates:

- **In Progress** means syncing is underway
- **Success** indicates completion

5. View detailed list of updates made, including when and who made the updates.

Unpublished Changes						
Published Changes						
Menu Syncs						
Published Changes						
Menu	Name	Category	Timestamp	User	Store Time Zone	Synced to Store
HH Main	Slice	ItemPreference Added	7/1/24, 10:48 AM	Smith, Barrett	Central Standard Time	Success
MenuName	FieldName	Operation	Previous Value	Current Value		
HH Main	Default Member	Add	None	None		
HH Main	GroupName	Add	None	Subs		
HH Main	ItemName	Add	None	Chicken Parmesan Sub		
HH Main	MenuName	Add	None	HH Main		
HH Main	PreferenceName	Add	None	Slice		

6. Reload your POS system to view the latest updates once syncing is complete.
