Image Repository Overview

The image repository system is used for merchants to add images of their menu items. This platform is used for **Grubhub**, **DoorDash**, and **UberEats**.

Getting Started

The following steps below will walk you through the process of signing in and using the Image Repository.

Please Note: Only Company Admins have the appropriate permissions to access the Image Repository.

STEPS

- Click or go to this link in Restaurant Management under Manage Images > 3rd Party: <u>https://hub.hungerrush.com/Integrations/Index/images</u>
- 2. Select your store and the menu associated with your store. You can select multiple stores to pull in multiple menus if your locations have different menus. Duplicates will not be saved.
- 3. Once the store/menu has been added, click the **Upload** button (shown below) to begin adding images to each corresponding menu item.

Important Items to Note

Although there are no file size limitations, it is recommended that the images uploaded are of the highest resolution possible.

Images are auto scaled to fit the destination source.

Only Items can have images associated with them, Groups are not currently allowed to have associated images.

Anytime a change is made in the Image Repository, you must refresh by going to Manage > System > Stores > Configuration > Ordering Channels.

HungerRush

Images can be downloaded by clicking the **Download** icon.
